con accenti  
diversi su  
parti  
diverse  
della nostra  
nuvola  
SOA

2

### 1) Web Server → TOMCAT

- scarico del sito apache
- si occupa tutto
- si mette "a posto"

env → CATALINA\_HOME

JAVA\_HOME

... /jakarta-tomcat/bin → PATH

CHECK localhost:8080

3

## 2) installare Axis

servizi da apache.org

occupato

webapps/axis

↳

↳ /.../tancel/webapps

installare

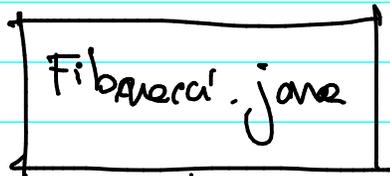

JAF

Java activation  
framework

CLASSPATH ← /.../webapps/axis/WEB-INF/lib  
\*.jar

localhost:8080/axis ↔ Validation

4  
3) Use framework "a servizi"

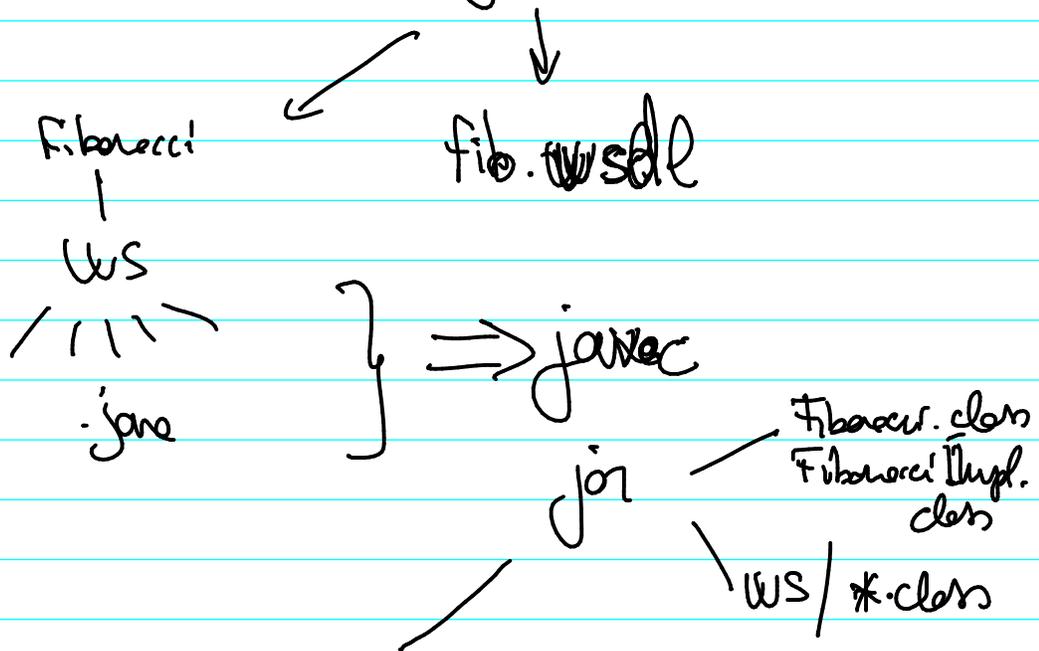

interfaccia

implementazione

axis..... Jaxw 2 WSDL .....

↙  
webapps / axis / WEB-INF / lib

shutdown.sh } for repetitive  
startup.sh } launch

localhost:8080 / axis

→ list ⇒ fibonacci

6

## 4) Redirezione del client
